

Declaration

Declare a variable

```
int nrStudents;
```

.. basically means, we want a variable of type int and we will call it nrStudents.

Declare a variable

```
int nrStudents;
```

int - only integer values are allowed. Type specifies the properties.

Declare a variable

```
int nrStudents;
```

nrStudents - the name we want. nrStudent is sometimes called an identifier.

Declaration

Type of a variable (followed by)

Name of variable

```
int x;
```

Declaration

Only variables?

More to come :)
