

Passing objects

Passing primitive type

```
changeVolume (2) ;
```

Passing primitive type

```
int af2Volume = af2.currentVolume();  
af1.changeVolume(af2Volume);
```

Or simply:

```
af1.changeVolume(af2.currentVolume());
```

```
af2.currentVolume()
```

Is an expression. Just as was "1"
or "2+17"

Passing object references

```
playlist.add(af1);  
playlist.add(af2);
```
